

SOME TAPS HAVE PROBLEMS THAT ARE HARDER TO SEE THAN OTHERS.

That's why
you should always
LOOK for the
WaterMark

In Australia, most plumbing and drainage products must be certified.
If they aren't, they're not compliant with Australian standards.
The WaterMark means that products are safe, certified, and fit for purpose.

Buying non-compliant products will likely cost you time and money.
WaterMark certification is mandatory, and if purchased plumbing products
or fittings don't carry the mark, a licensed plumber will not install it.

To make sure you avoid any problems, check for WaterMark certification at

watermark.abcb.gov.au/look

The WaterMark Certification Scheme is an initiative of the Commonwealth of Australia and the States of New South Wales, Victoria, Queensland, Western Australia, South Australia and Tasmania, and the Australian Capital Territory and Northern Territory.
